COMMENTS AND EXPLANATION OF ANY VIOLATION ***(Reference all attachments here)***

The chronic mercury limit shall apply only if the discharge of batches containing mercury occurs four (4) or more consecutive days/week during the monitoring period; otherwise, only the daily maximum limit for batches containing mercury shall apply. If any individual analytical test result for mercury is less than the minimum qualification level (0.0002 mg/l), then a value of zero (0) may be used for the DMR calculations and reporting requirements. **February 2010 did not have 4 consecutive days of discharge.** The TRC limit is only applicable when chlorine is used in the treatment process.
