Good morning,

Please call me at your convenience. I tried to write you an email response..... but I don't want to add to the confusion.

Regards,

Mike Dunsmuir

Subject RE: 08cp308 -- AW: GNS-16 Certificate Changes for Rev 5

Hello Mike,

Does their response mean that all of loading variant one is the proposed change or only a portion. I don't see sidebars on the certificate, so I can't tell what the change is. The impression I had was that only the 40 special fuel plates was the change (the last bullet of loading variant 1). However, from the email, it sounds like the entire loading variant 1 is the change. Therefore including loading "up to 32 box shaped MTR FAs and MTR SFAs with enrichment level HEU(1) or up to 33 box shapted MTR FAs…."

Is this correct, that we need to look at all of loading variant one as the proposed change?

Hi Nancy,

The following is the response from NCS regarding the GNS-16 contents.

Have a good week,

Mike Dunsmuir

Subject 08cp308 -- AW: GNS-16 Certificate Changes for Rev 5

Dear Mike,

We had a new check into the files :
The **german Rev. 4** has been validated in the US under **USA**/0551/B(U)F-85 – **Rev. 5** for loading variant 1 and 3 *(Variant 2 is not needed).*
So we think it should not take to much time to insert variant 3 into the next **US Rev. 6** (of German rev. 5) as it has already been validated.
In any case, should this make trouble and cause delay, we agree to get only variant 1 (including the mini plates) validated.
Please let us know the decision of NRC.
Kind regards.
Colette

Betreff: GNS-16 Certificate Changes for Rev 5

Dear Colette,

I was on a conference call with the NRC and DOE today and a question came up regarding the contents changes. The NRC thinks there are three contents changes being made by this revision: 1 - the miniplate fuel holder for FRG, 2. tubular MTR and 3. TRIGA. The NRC wants to be sure their review is done in time to support the FRG shipment, so they want to limit their review to only (1) the special fuel plates for FRG.

The question to you is: does the NRC need to also include the changes to 2 and 3 in their review, or can they limit (shorten) the review to only item 1? Are these changes(2 and 3) supporting a current or planned FRR program shipment?

Best regards,

Mike Dunsmuir
