REGULATORY CONFERENCE – ST. LUCIE NUCLEAR PLANT
DOCKET NOS. 50-335 AND 50-389

Dear Mr. Nazar:

This letter confirms the telephone conversation between Mr. Eric Katzman of your staff and Mr. Binoy Desai of the NRC, on February 1, 2010, concerning a Regulatory Conference, being conducted at your request, which has been scheduled for February 19, 2010, from 2 p.m. to 4:00 p.m. (EST). The meeting notice, which provides additional details, is enclosed. The purpose of the Regulatory Conference is to discuss the risk significance of the two preliminary greater than green inspection findings documented in NRC Inspection Report 05000335, 389/2009006. These findings concern apparent failures to identify and correct design issues associated with an October 8, 2008, air intrusion event from the Unit 1 containment instrument air system into the component cooling water system.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room (PDR) or from the Publicly Available Records (PARS) component of NRC's Agencywide Document Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).
