SUBJECT: PUBLIC MEETING ON MARCH 23, 2006, TO DISCUSS POINT BEACH  
SAFETY CULTURE SURVEY RESULTS

Dear Mr. Koehl:

This letter refers to the public meeting conducted on March 23, 2006, at the Two Creeks Town Hall in Two Creeks, Wisconsin. The meeting was held at your request to discuss the results of a safety culture survey performed by Nuclear Management Company (NMC) at Point Beach Nuclear Plant.

Mr. Patrick Loudon, Branch 5 Chief, Division of Reactor Projects at NRC Region III, opened the meeting with introductions of Nuclear Regulatory Commission (NRC) officials and then turned the meeting over to you and your staff.

Your presentation opened with an overview of four areas ("enablers") to address the results of previous self-assessments at Point Beach. This discussion included a description of the Point Beach Excellence Plan and provided a time-line of pertinent actions (assessments, training) taken by NMC prior to the December 2004 safety culture survey. Then, you discussed NMC's response to the self-assessment results, and provided an overview of ongoing efforts in the four enablers.

Next, you and your staff discussed in detail the four enablers: selecting and retaining the right people; verification of effective implementation of processes; communication and reinforcement of the right picture; and, effective coaching and engagement. You discussed the Site Performance Index, used to monitor these four main areas and measure progress.

Finally, you and your staff discussed initiatives to address the results of the December 2004 safety culture survey. You closed the meeting with an overview of your presentation.

Mr. James Caldwell, Region III Administrator, concluded the meeting with an acknowledgment of the information provided by you and other NMC representatives. Mr. Caldwell emphasized the importance of safety culture and stated that the NRC will continue review of the condition of the safety conscious work environment at Point Beach.
