Subject: Issues with the Terrestrial FLUCCS & Wetland Native Files

Paul,

The staff would like to request that PEF verify the following:

There are inconsistencies with the data provided by PEF. The GIS layers and associated acreage estimates/map for disturbance/cover type provided by PEF do not match the text/table summaries provided by PEF. The acreage estimates being used in the DEIS come from ER Rev 1 (Table 2.4-1, p. 2-421) and NPD-NRC-2009-203 (Table 2.4.1-3-001; September 3, 2009). We expected that the GIS information associated with NPD-NRC-2009-214 (October 22, 2009) would be a match; however, it was not and we subsequently reviewed all GIS data provided by PEF to find no match with the tables.

We are asking that PEF: (1) provide the GIS files that it used to determine the acreage estimates it submitted and (2) verify that the acreage estimates already provided are still valid.

Thanks,

Doug
