Joe/Mike,
Please find attached a very "basic" figure representing the locations of the excavations for Units 2 and 3 in relation to the location of the crane foundation. Since this figure was produced the shape of the excavation has changed a little, but still maintains the same with respect to the crane. In addition the road access to the Unit 2 excavation has moved from the NE to the SW corner of the excavation. However, this general figure is a good representation of the excavations. If you need something more, please give me a call.
Thank you!
Amy
