Incidence Rates Death Rates Incidence Counts Death Counts Incidence Population Death Population

All Cancer Sites Combined. Age-Adjusted Cancer Death Rates and 95% Confidence Intervals by U.S. Census Region and Division, State, and Race and Ethnicity, United States (Table 2.1.1.2MF) *†

Rates are per 100,000 persons and are age-adjusted to the 2000 U.S. standard population (19 age groups - Census P25-1130).

95% Confidence Interval : Hide Show

Geographic Area	All Races	White	Black	Hispanic ‡§
United States	186.9	185.4	229.0	124.5
West	170.9	174.6	217.1	129.1
Mountain	166.6	168.1	187.4	141.0
Idaho	171.6	172.6	128.2	119.3

(Table 2.1.1.2MF) All Cancer Sites Combined. Age-Adjusted Cancer Death Rates and 95% Confidence Intervals by U.S. Census Region and Division, State, and Race and Ethnicity, United States *†

Footnotes

* Rates are per 100,000 persons.

† Data are from the National Vital Statistics System (NVSS).

‡ Data for specified racial or ethnic populations other than white and black should be interpreted with caution. See Technical Notes.

§ Hispanic origin is not mutually exclusive from race categories (white, black).

~ Rates are suppressed if fewer than 16 cases were reported in a specific category (area, race, ethnicity).

Confidence interval (CI): Range of values for a rate that will include the true value of the rate a given percentage of the time. Example: 95% CI includes the true value of the rate 95% of the time.

Notes: U.S. rates are as presented in Table 1.1.1.2MF.
