Subject: STP's new source of data for MCR Breach

http://www.vulcanhammer.net/geotechnical/ETL-1110-2-561.pdf

Please look at Table H-1 in the document, ETL 1110-2-561 31 Jan 06 H-6 **Table H-1 (Table 11.1 UNSW): Average Probability of Failure of Embankment Dams by Mode of Piping and Dam Zoning.**

Please let me know what you think. I will be reviewing it too.

In any event, my management does not support the 1000/16250 feet reduction and the fact that there is no defense in depth.

Thank you.
Marie
