Steven D. Wintheiser
Radiation Safety Officer
CTI and Associates, Inc.
51331 W. Pontiac Trail
Wixom, MI 48393

Dear Mr. Wintheiser:

Enclosed is Amendment No. 25 to your NRC Material License No. 21-17007-01 in accordance with your requests. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note that we did not approve the deletion of your former location of use (for storage) at 12482 Emerson Drive, Brighton, Michigan at this time because the information provided in your letter dated December 9, 2009, was insufficient to complete our review.

If you wish to pursue this request please submit the information below as a written response, addressed to my attention as "additional information to control number 318687." We will then continue our review.

Specifically, we were unable to approve the deletion of 12482 Emerson Drive, Brighton, Michigan from your license because a review of our records of your inspection and enforcement history revealed that this location had been used to store licensed materials. However, your letter dated December 9, 2009, asserted that this location had never been used to store license materials.

In order for us to delete this location from your license please submit a copy of the most recent leak test records for all sealed sources and gauging devices that were stored there, in order to demonstrate that no residual radioactive contamination could exist.

Please also be reminded of the provisions in 10 CFR 30.9(a), "Completeness and accuracy of information,"..."(a) Information provided to the Commission by an applicant for a license or by a licensee or information required by statute or by the Commission's regulations, orders, or license conditions to be maintained by the applicant or the licensee shall be complete and accurate in all material respects."

Please be aware that License Condition 13 has been added to your license. This does not impose any new requirements, but highlights the regulatory requirements for establishing decommissioning financial assurance.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

S. Wintheiser

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf and the link for frequently asked questions regarding protection of security related sensitive information may be located at: http://www.nrc.gov/reading-rm/sensitive-info/faq.html.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Jose Macatangay

Jose D. Macatangay
