FirstEnergy Nuclear
Attn: Mr. Greg Halnon
Director Regulatory Affairs, A-GO-2
76 S. Main St.,
Akron, OH 44308

Dear Mr. Halnon:

Thank you for presenting at the U.S. Nuclear Regulatory Commission's 22nd Annual Regulatory Information Conference (RIC), March 9 – 11, 2010, in Rockville, Maryland. This year the total number of participants reached over 2,800 participants including international representatives from over 25 countries.

Initial feedback from participants indicates that this year's RIC was another resounding success. Your dedication and support helps the U.S. NRC to "raise the bar" each year to develop a comprehensive program filled with discussion topics that are timely and relevant.

Your presentation on the Fatigue Management Rule: Industry Perspective of the Future during the Fatigue Management at Nuclear Power Facilities – Lessons Learned during the Implementation of 10 CFR Part 26, Subpart I session provided important information about industry initiatives that are underway in the nuclear arena. The interest of the attendees was evident by the range of questions raised during the question-and-answer period following the panel presentations.

All final presentation slides and questions that were not addressed during the conference are being compiled and will be posted on the NRC's RIC website at: http://www.nrc.gov/public-involve/conference-symposia/ric/index.html. Again, thank you for your participation at NRC's 2010 Regulatory Information Conference. It is your commitment and support that helped to make the RIC a success.

We hope you will join us for the 23rd Annual RIC March 8-10, 2011, at the Marriott Bethesda North Hotel and Conference Center, Rockville, Maryland.

Warm regards,

Undine Shoop, Chief ***/RA/***
