Rob,

Attached please find the subject request for additional information (RAI). The draft of this RAI was sent to you on March 23, 2010. No clarification phone call on the draft RAI was requested by UniStar.

The schedule we have established for review of your application assumes technically correct and complete responses within 30 days of receipt of RAIs. For any RAIs that cannot be answered within 30 days, it is expected that a schedule date for submitting your technically correct and complete response will be provided to the staff within the 30 day period so that the staff can assess how this information will impact the review schedule.

Your response letter should also include a statement confirming that the response does or does not contain any sensitive or proprietary information.

Thanks.

4/5/2010

Calvert Cliffs Unit 3
UniStar
Docket No. 52-016
SRP Section: 04.03 - Nuclear Design
Application Section: 4.3

QUESTIONS for Reactor System, Nuclear Performance and Code Review (SRSB)

04.03-1

In U.S. EPR RAI 344, Question 04.03-27, AREVA NP Inc. was requested to provide a COL Item in the FSAR for the U.S. EPR to address plant specific surveillance of the reactor internals in regard to fluence methodology benchmarking. The COL FSAR will need to address this COL information item once it is added to the U.S. EPR FSAR Tier 2, Section 4.3. In a letter dated March 12, 2010, UniStar stated that when the COL item is added to the U.S. EPR FSAR, the applicable parts of the COL application for CCNPP Unit 3 would be updated to address this additional requirement. Provide an update to the COL FSAR Tier 2 to include the additional requirements of the COL item referenced above, when available.
