Dear Mr. Hale:

The U.S. Nuclear Regulatory Commission staff (NRC) in the Containment and Ventilation Branch of the Office of Nuclear Reactor Regulation is reviewing the Auxiliary Feedwater Modification license amendment request for Units 1 and 2 of the Point Beach Nuclear Plant. The staff determined that additional information is required to complete its review. In an effort to complete the review, the staff has developed requests for additional information (RAIs).

The NRC staff discussed the draft RAIs with you and your staff in a conference call on October 1, 2010. The conference call resulted in the final RAIs which are provided as an attachment to this e-mail. Finally, you stated that a response to these questions would be provided no later than October 12, 2010.

Please don't hesitate to contact me if you have any questions or concerns.

Sincerely,

Terry A. Beltz, Senior Project Manager
Plant Licensing Branch III-1
Division of Operating Reactor Licensing
