Dear Sir:

We are opposed to "NFS" 40-year "special materials" license because we can't trust them with our health. Since the nuclear industry came to town we have had the nations highest cancer rate.

Enriched Uranium is one of the worst, longest-lived poisons known to man. There is no way to get it out of our drinking water, ie, the Nolichucky River.

Like AIDS, nuclear waste kills the immune system. One organ shuts down at a time. We don't want to have to eat, breathe, or drink the contamination. Death by cancer is no picnic.

Sincerely,

Alma Mesker
