U.S. Nuclear Regulatory Commission

Regarding DCP 63, provide justification for adding another time delay for open PRHR discharge valves.

10 CFR 52.47(a)(2) requires in part, that the description shall be sufficient to permit understanding of the system designs and their relationship to the safety evaluation. The design information provided for the design basis items, taken alone and in combination, should have one and only one interpretation. The markup for AP1000 DCD, Tier 2, Figure 7.2-1 (sheet 19 of 20), added a time delay to open PRHR discharge valves. The new time delay was not mentioned in DCP 63.
