Subject: Re: comment on AP 1000 ACRS meeting

To the AP 1000 ACRS committee:
In light of the obvious and extremely dangerous defects found in the safety system design, it would be highly negligent of the NRC to approve the Toshiba Westinghouse AP 1000 reactor. For a complete description of the design flaws, please see http://www.fairewinds.com/sites/default/files/Fairewinds_AP1000_Supplemental_Report_12-21-2010.pdf

Sincerely,
Lisa Kasenow
