Subject: RE: STP - RAI .3.11-1 supplemental response

John,

I've discussed this with our tech reviewer and he no longer has a problem. We do not need any discussion.

RAI 03.11-1 is closed and resolved and the Phase 4 SER has been revised to reflect this status.

regards

Subject: STP - RAI .3.11-1 supplemental response

John,

In the revised response to RAI 03.11-1 dated February 22, 2011, our reviewer would like NINA to explain the following statement as it relates to mechanical equipment:

"For equipment located in a mild environment, certificate of compliance shall be submitted certifying that the equipment has been qualified to assure its required safety-related function in its applicable environment. This equipment is qualified for dynamic loads as addressed in Sections 3.9 and 3.10. Further, a surveillance and maintenance program will be developed to ensure equipment operability during its designed life (Subsection 3.11.6)."

Although we have a Monday (3/7) call in the afternoon, the agenda is quite full. We can take advantage of the Thursday (3/10) OI call if you can arrange the appropriate personnel. Please let me know.

Regards

Tom Tai
