To Whom It May Concern,

To take additional water from Lake Granbury will probably have such an impact on the City of Granbury, that it will probably lose the aura of what makes Granbury the city it is today. With the loss at the proportions proposed,

Granbury would lose me & many other out-of-towners that have lake property for recreational use only. With the amount of money we spend annually and multiply that figure by the thousand, there would be a trickle down impact as if a tornado went through town. Then there are the families that have retired and moved to Granbury strictly for being on or near a lake. I guess Lake Worth and many other surrounding lake areas would get the benefits.

As a Lakefront homeowner on Lake Granbury, I am pleading with you, along with many of my neighbors, regarding the BRA's request for additional water rights, and to do anything in your power to conserve our ability to use Lake Granbury for recreation.

Two years ago, the Lake was down approx. 5 ft and it was devastating & impossible for many homeowners to use their boat docks. It certainly had to have a negative impact on all facets of the City of Granbury. Sales tax revenue, restaurants, boat dealers, shops on the Square all had to experience a negative impact. If we lose water at the proposed proportions, Granbury will be no more than a highway going north & south.

Thanks for your help,
