September 25, 2006

Dear Mr. E. William Brach:

SUBJECT: Docket 71-9239, License Renewal Application for Certificate of Compliance No. USA/9239/AF, MCC-3, MCC-4, and MCC-5 Packages - Addendum

In accordance with 10 CFR 71.38, Renewal of certificate of compliance or quality assurance program approval, Westinghouse Electric Company has filed an application for renewal of existing Certificate of Compliance number 9239. A consolidated application was submitted that incorporates all changes previously incorporated by reference in existing approvals or certificate. There no changes to the application for package approval that are not authorized in the existing certificate or other approvals.

Changes previously incorporated by reference in existing approvals or certificate included Westinghouse Drawing No. 6481E15 that was revised to show the correct parameters for 15X15 B&W fuel assembly type. This change was previously approved by NRC letter dated September 27, 2004, Docket No. 71-9292, TAC No. L23765. The drawing is included in the application as fuel assembly cross sectional views in Appendix 1-3 Container Drawings. The revised drawing is provided as an addendum to the renewal application.

A copy of the drawing is submitted for paper submission as an addendum to the renewal application. Additional copies or electronic submission are available upon request. Should you have any questions, or require additional information, please contact the undersigned either by telephone at (803) 647-3167, or by email at vescovpj@westinghouse.com.

Sincerely,

Peter J. Vescovi
