Andrew Kugler
Senior Environmental Project Manager
Division of Site and Environmental Reviews
Office of New Reactors
Nuclear Regulatory Commission
Mail Stop: T-6D32
Washington D.C. 20555-0001

Dear Mr. Kugler:

This letter is written as a request for additional information regarding the Florida Power & Light (FPL) Turkey Point Units 6 & 7 application that has been assigned U.S. Army Corps of Engineers (Corps) file number SAJ-2009-02417 (IP-MLC).

As part of the consideration of the aforementioned project, the Corps submitted a request for a further in-depth alternatives analysis to the Nuclear Regulatory Commission on October 29, 2010.

As a clarification to that request, the Corps is requesting that Florida Power and Light consider a third option to the western transmission line corridor, one that does not include impacts to Everglades National Park or its boundary as a form of avoidance and minimization for the on-site proposal.

Should you have any additional questions, please contact me, at the letterhead address or by telephone (305) 526-7182, by fax (305) 526-7184 or by e-mail at Megan.L.Clouser@usace.army.mil.

Sincerely,

Megan Clouser
Senior Project Manager
