SUMMARY [redacted]

NAC: Tony Patko, Tom Danner
NRC: Kim Hardin, Jennie Rankin

A telephone conversation was initiated by the NRC to discuss the RSI response submittal format and to clarify the impact limiter configuration for the MAGNATRAN transport cask. NAC is scheduled to submit RSI responses by the end of June 2011. Staff informed NAC that due to the suspension of the case, a consolidated application is requested for ease of the technical and administrative review. There was a question on the process for submitting an electronic copy of the Safety Analysis Report (including the proprietary information). Staff will follow up with NAC on this outstanding question.

The impact limiter configuration was also discussed. Previous telephone conversations had indicated potential geometry modifications and physical testing to benchmark the impact limiter analysis. NAC indicated that the presentation of the new impact limiter design may not have been clear and a new presentation/analysis is being drafted. NAC requested a telephone conversation with the structural reviewer to discuss the new path for the impact limiter design.
