**Subject:** Additional information for NRC license amendment request for Bayhealth Medical Center, mail control 575332

Licensee: Bayhealth Medical Center
License No: 07-14850-01
Docket No.: 03007565
Mail Control No.: 575332

To: Jay Yoder, Consultant Physicist

Please send a return e-mail to confirm that you received this message.

I have been assigned to work on the amendment request dated June 7, 2011 to add two authorized user (AU) physicians for 10 CFR 35.200 byproduct materials. Sufficient information was provided to name Laeeq Ahmer, M.D. as AU, however additional information is required for Harjinder S. Grewal, M.D.:

> It is necessary to document that Dr. Grewal completed all requirements of 10 CFR 35.290(c)(1). Partial documentation was provided to show that he received 200 hours of classroom and laboratory training in specified topics in 1997, however the information indicated in Section 3b on pages 2 and 3 of the submitted Form 313A(AUD) was not provided. In accordance with the recency of training requirements of 10 CFR 35.59, it is also necessary to show that Dr. Grewal received related continuing training and experience within the past seven years. Please provide documentation, including dates, to show that Dr. Grewal completed a minimum of 500 hours of work experience, under the supervision of an authorized user, involving each of the following tasks:
>
> a) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
> b) Performing quality control procedures on instruments used to determine the activity of dosages and performing checks for proper operation of survey meters;
> c) Calculating, measuring, and safely preparing patient or human research subject dosages;
> d) Using administrative controls to prevent a medical event involving the use of unsealed byproduct material;
> e) Using procedures to safely contain spilled radioactive material and using proper decontamination procedures;
> f) Adminstering dosages of radioactive drugs to patients or human research subjects; and
> g) Eluting generator systems appropriate for preparation of radioactive drugs for imaging and localization studies, measuring and testing the eluate for

radionuclidic purity, and processing the eluate with reagent kits to prepare labeled radioactive drugs.

Please submit the information described above within 30 days, under signature of Bayhealth Medical Center senior management. If a response is not received within 30 days, we will presume that the medical center does not wish to pursue the request to name Dr. Grewal as AU. They may mail this information to the Region I office or submit it by fax to my attention at 610-337-5269, referencing mail control 575332.

Please feel free to contact me with any questions. I will be away on vacation until July 12, and will respond at that time.

Thank you,

Sandy Gabriel
