CHAPTER 19—PRA AND SEVERE ACCIDENT
TABLE OF CONTENTS

19.0 PROBABILISTIC RISK ASSESSMENT AND SEVERE ACCIDENT EVALUATION 19.0-1

19.0.1 NRC Regulatory Requirements and Related Policies 19.0-1

19.0.2 Uses of PRA and Severe Accident Evaluations 19.0-2

19.0.3 Structure of Chapter 19 ..... 19.0-3

19.0.4 References 19.0-4

19.1 Probabilistic Risk Assessment 19.1-1

19.1.1 Uses and Applications of the PRA 19.1-1

19.1.1.1 Design Phase 19.1-1

19.1.1.2 Combined License Application Phase 19.1-2

19.1.1.3 Construction Phase 19.1-2

19.1.1.4 Operational Phase 19.1-2

19.1.2 Quality of PRA 19.1-2

19.1.2.1 PRA Scope 19.1-3

19.1.2.2 PRA Level of Detail 19.1-4

19.1.2.3 PRA Technical Adequacy 19.1-5

19.1.2.4 PRA Maintenance and Upgrade 19.1-7

19.1.3 Special Design/Operational Features 19.1-11

19.1.3.1 Design/Operational Features for Preventing Core Damage 19.1-12

19.1.3.2 Design/Operational Features for Mitigating the Consequences of Core Damage and Preventing Releases from Containment 19.1-14

19.1.3.3 Design/Operational Features for Mitigating the Consequences of Releases from Containment 19.1-15

19.1.3.4 Uses of the PRA in the Design Process 19.1-15

19.1.4 Safety Insights from the Internal Events PRA for Operations at Power 19.1-16

19.1.4.1 Level 1 Internal Events PRA for Operations at Power 19.1-16

19.1.4.2 Level 2 Internal Events PRA for Operations at Power 19.1-65
19.1.5 Safety Insights from the External Events PRA for Operations at Power 19.1-110
19.1.5.1 Seismic Risk Evaluation 19.1-110
19.1.5.2 Internal Flooding Risk Evaluation 19.1-116
19.1.5.3 Internal Fires Risk Evaluation 19.1-136
19.1.5.4 Other Externals Risk Evaluation 19.1-155
19.1.6 Safety Insights from the PRA for Other Modes of Operation 19.1-158
19.1.6.1 Description of the Low-Power and Shutdown Operations PRA 19.1-158
19.1.6.2 Results from the Low-Power and Shutdown Operations PRA. 19.1-168
19.1.6.3 Description of Level 2 PRA for Low-Power and Shutdown Operations 19.1-174
19.1.6.4 Results of the Low Power and Shutdown Level 2 Evaluation 19.1-185
19.1.7 PRA-Related Input to Other Programs and Processes 19.1-191
19.1.7.1 PRA Input to Design Programs and Processes .. 19.1-191
19.1.7.2 PRA Input to the Maintenance Rule Implementation 19.1-191
19.1.7.3 PRA Input to the Reactor Oversight Process 19.1-191
19.1.7.4 PRA Input to the Reliability Assurance Program 19.1-191
19.1.7.5 PRA Input to the Regulatory Treatment of Non-Safety-Related Systems Program 19.1-192
19.1.8 Conclusions and Findings 19.1-192
19.1.8.1 Risk Metrics: 19.1-192
19.1.8.2 Risk Distribution: 19.1-193
19.1.8.3 Importance Ranking: 19.1-193
19.1.8.4 Sensitivity and Uncertainty: 19.1-194
19.1.9 References 19.1-195
19.2 Severe Accident Evaluations 19.2-1
19.2.1 Introduction 19.2-1
19.2.2 Severe Accident Prevention 19.2-1

19.2.2.1 Anticipated Transient Without Scram 19.2-1
19.2.2.2 Mid-Loop Operations 19.2-2
19.2.2.3 Station Blackout 19.2-2
19.2.2.4 Fire Protection 19.2-3
19.2.2.5 Intersystem Loss of Coolant Accident 19.2-3
19.2.2.6 Other Severe Accident Preventative Features 19.2-4
19.2.3 Severe Accident Mitigation 19.2-5
19.2.3.1 Overview of Containment Design 19.2-5
19.2.3.2 Severe Accident Progression 19.2-6
19.2.3.3 Severe Accident Mitigation Features 19.2-9
19.2.4 Containment Performance Capability 19.2-24
19.2.4.1 Introduction 19.2-24
19.2.4.2 Analytical Methodology 19.2-25
19.2.4.3 Assumptions 19.2-30
19.2.4.4 Severe Accident Evaluations 19.2-30
19.2.4.5 Conditional Containment Failure Probability 19.2-54
19.2.4.6 Summary 19.2-55
19.2.5 Accident Management 19.2-55
19.2.5.1 Accident Management through Design 19.2-57
19.2.5.2 OSSA Directed Actions 19.2-57
19.2.5.3 Interface with Emergency Procedures 19.2-57
19.2.5.4 Measurable Safety Objectives 19.2-58
19.2.5.5 RPV Integrity Management 19.2-58
19.2.5.6 Post-RPV Failure - Short-Term Response 19.2-59
19.2.5.7 Post RPV Failure - Long-Term Response 19.2-59
19.2.6 Consideration of Potential Design Improvements under 10 CFR 50.34(f) 19.2-59
19.2.6.1 Introduction 19.2-59
19.2.6.2 Estimate of Risk for Design 19.2-60
19.2.6.3 Identification of Potential Design Improvements ... 19.2-60
19.2.6.4 Risk Reduction Potential of Design Improvements 19.2-62
19.2.6.5 Cost Impacts of Candidate Design Improvements 19.2-63

19.2.6.6 Cost-Benefit Comparison 19.2-63
19.2.6.7 Conclusions 19.2-63
19.2.7 Beyond Design Basis Large Commercial Aircraft Impact Assessment 19.2-63
19.2.7.1 Introduction 19.2-63
19.2.7.2 Assessment Scope 19.2-63
19.2.7.3 Methodology 19.2-64
19.2.7.4 Design Features Credited for Conformance with 10 CFR 50.150 ..... 19.2-64
19.2.7.5 Evaluation of U.S. EPR Performance 19.2-68
19.2.7.6 Conclusions 19.2-70
19.2.8 References 19.2-70
19.3 Open, Confirmatory, and COL Action Items Identified as Unresolved 19.3-1
19.3.1 Resolution of Open Items 19.3-1
19.3.2 Resolution of Confirmatory Items 19.3-1
19.3.3 Resolution of COL Action Items 19.3-1
19A Event Trees for Core Damage Sequences Initiated During Power Operation 19A-1
19B Event Trees for Core Damage Sequences Initiated During Low Power Operation 19B-1
19C Containment Event Trees (CET) for Containment Performance Sequences Initiated During Power Operation 19C-1
