FEMA

September 17, 2010

Mr. Elmo E. Collins, Jr.
Regional Administrator, U.S. NRC, Region IV
611 Ryan Plaza Drive, Suite 400
Arlington, TX 76011-4005

Dear Mr. Collins:

Enclosed is a copy of the radiological emergency preparedness final report for the Comanche Peak Nuclear Power Plant (CPNPP) Reception Center drill evaluated on August 18, 2010, by the U.S. Department of Homeland Security/Federal Emergency Management Agency Region 6. My staff evaluated the Cleburne Reception Center and the Cleburne Conference Center. There were no Deficiencies and one Area Requiring Corrective Action (ARCA) identified and corrected during the drill. Seven Plan Issues were also identified as a result of the drill.

Based on the results of the drill, the offsite radiological emergency response plans and preparedness for the CPNPP and the affected local jurisdictions are deemed adequate to provide reasonable assurance that appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency. Therefore, 44 CFR Part 350 approval of the offsite radiological emergency response plans and preparedness for the State of Texas site-specific to CPNPP will remain in effect.

A copy of this report was provided to Ms. Lisa Gibney at NRC Headquarters as well as the NRC Headquarters Document Control Desk. Should you have questions, please contact me at (940) 898-5199, or Linda Gee, Radiological Emergency Preparedness Site Specialist, at (940) 898-5368.

Sincerely,

Lisa R. Hammond
RAC Chair
