LISLE, ILLINOIS 60532-4352

DEC 21 2010

John T. Thornton,
Corporate Radiation Safety Officer
Professional Service Industries, Inc.
1901 South Myers Road
Suite 400
Oakbrook Terrace, IL 60181

Dear Mr. Thornton:

Enclosed is Amendment No. 79 to your NRC Material License No. 12-16941-01 in accordance with your request. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

**In your correspondence to us dated September 24, 2010 and December 14, 2010, you indicated that you wished to release for unrestricted use a former address of use and area of use, located at 1000 North Opdyke Road, Auburn Hills, Michigan.**

**The NRC staff has reviewed your final status surveys, which consisted of leak test results taken from your gauging devices. Based on its review, the staff has concluded that all licensable radioactive material has been removed from your former address of use and area of use, located at 1000 North Opdyke Road, Auburn Hills, Michigan, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.**

**Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for this address of use and area of use and they are suitable for unrestricted use.**

**Please note that we added Condition No. 13.F to your license. This change should enhance your awareness of regulatory requirements and the radiation safety program elements in your license.**

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

J. Thornton

**Thank for providing the correct model number of the Troxler portable gauge device that I incorrectly documented in our phone conversation record dated December 13, 2010. We also made some grammatical corrections to Item Nos. 8.A and 8.B of your licenses. We apologize for any inconvenience these errors may have caused.**

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf and the link for frequently asked questions regarding protection of security related sensitive information may be located at: http://www.nrc.gov/reading-rm/sensitive-info/faq.html.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

J. Thornton

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Michael G. Herr, CHP
Materials Licensing Branch
