Subject: RE: Questions regarding the RAI

I contacted the RAI contributors to determine their availability for a teleconference. I'll let you know when would be a good time for the call.

Regarding the steel insert, it is acceptable to only remove references to the steel insert from Chapters 7 and 8 and to retain them in the remaining chapters.

Chris

Subject: Questions regarding the RAI

Good Morning Chris,

We have just a couple of questions regarding our RAI responses, the first I asked on the phone, regarding the steel insert and if I had to remove every reference to it throughout the SAR. With the LS we were allowed to leave all references to liquids in the SAR however they were not approved in the certificate I am hoping we can do the same regarding the HS steel inserts with all the sections other than 7 and 8.

Secondly we have come up with a solution regarding the vibration but we would like to speak to the assessor that asked the question to determine if our solution will be accepted. We are available today and next Monday (9th) and Tuesday (10th) if it would be possible to have a teleconference?

Thank you,
Sarah
