**Subject:** [External_Sender] NRC/FPL additional Clarification call for Hurricane Missiles RAI 6544

Manny
After further review by FPL and Westinghouse, it was determine it would be appropriate to revise our response to RAI 6544,Related to SRP Section 03.05.03 - Barrier Design Procedures. We plan on revising the Westinghouse proprietary (& non-proprietary) report which provided the original response. We anticipate this will take 2 to 3 weeks, however, we have not received a formal schedule from Westinghouse. Once I have a final schedule, I will update our planned submittal date.
If you have any questions, please let me know.
Thanks
Steve Franzone

**Cc:** TurkeyCOL Resource; vaugh.thomas@nrc.gov; Patel, Pravin; Maher, William; CHILDRESS, ELWOOD
**Subject:** Follow-up from Sept 3rd clarification Call

Brian/Manny
As a follow-up to last week's call, here is what we understand the clarifications to be:

- Using Wall 5 as an example, illustrate the calculation of the allowable shear for one-way and two-way action. Illustrate how bo and bw are obtained and used.
- Illustrate the calculation of the Dynamic Load Factor of 0.97 for Wall 1 as shown in Tables 3 and 4.

Thanks
