MAY 20 2011

Gregory P. Crouch
Radiation Safety Officer
Indiana University
Jordan Hall, Room 071
100 E. Third Street
Bloomington, IN 47405-6801

Dear Mr. Crouch:

Due to a change in NRC's licensing policies, we must obtain possession limits for all materials listed on your license. As we discussed by telephone on April 19, 2011, we have listed the total possession limit for any byproduct with the atomic Nos. between 84-98 as 15 millicuries in Item 8.C. in a corrected copy to Amendment No. 80 to your NRC Material License No. 13-00108-05.

NRC's Regulatory Issue Summary (RIS) 2005- 31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf and the link for frequently asked questions regarding protection of security related sensitive information may be located at: http://www.nrc.gov/reading rm/sensitive info/faq.html. A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

Please contact me at (630) 829-9839, if you have any questions.

Sincerely,

William P. Reichhold
