INSIGHT IMAGING

Memorandum of Understanding
InSight Health Corp.
NRC RAM License number: 22-29403-01

CLIENT NAME: University of Connecticut Health Center ("Client")

Client and InSight Health Corp. ("InSight") acknowledge that they have entered into an agreement in which InSight shall provide and operate a mobile PET or PET/CT unit at University of Connecticut Health Center ("UConn Health") located at 263 Farmington Avenue, Farmington CT 06030 ("Client's Facility"). The parties agree that, while the mobile PET or PET/CT unit is located at Client's Facility, InSight and UConn Health will retain full and complete responsibility for ensuring compliance with all regulatory requirements for safe use and handling of all sealed sources and radioactive materials while on client's premises and the mobile PET or PET/CT unit consistent with each party's radioactive materials license, and existing regulations of the state in which the mobile unit is located. Specifically:

InSight Health Corp shall be responsible for:

1. Training of technologists in radiation safety of the sealed sources and radioisotopes.
2. Providing quarterly audits for the PET unit equipment and sealed sources.
3. Ensuring that the mobile PET unit is secured (locked) while unoccupied, and that dose shipment boxes, empty or full, or any amount of radioactive material will remain in the unit.
4. Providing a qualified RSO for InSight's RAM license responsibilities.
5. Providing dosimetry monitoring for employees working on the PET unit.
6. Performing confirmatory dose calibrator measurements of unit radiopharmaceutical doses as an additional check on the radiopharmacy's required assay.
7. Ensuring that all documentation required by InSight's RAM license, as well as applicable state and federal regulations, is completed and maintained as required.
8. Ensuring that CT technologists operating PET/CT equipment are properly licensed and/or approved in the state where these services are performed.
9. Escorting or providing a suitable escort for any patient that requires use of UConn Health's designated PET restroom facility which is posted for use by "PET Patients Only". The escort shall ensure that patient contact or proximity to members of the public is minimized and that the restroom is inspected after use to ensure that no patient excreta requires cleanup. In addition, InSight personnel will perform and document a radiation survey of the restroom facility at the end of each day in the same manner that other areas of use are surveyed.

UConn Health shall be responsible for

1. Designating one or more authorized user(s) ("Authorized User") to be responsible for reviewing the ordering physician's request of a PET scan. The Authorized User will supervise PET technical staff and should be listed on the client facility's RAM license.
2. The Authorized User will maintain authority and control over patients being injected on the mobile PET unit.
3. The Authorized User will be available to the PET technical staff to answer patient-related questions.
4. F-18 FDG will be supplied as a unit dose and may be ordered by the InSight technical staff as prescribed by the Authorized User.
5. Providing a designated restroom facility for the use of PET patients which minimizes, to the extent practicable, the distance needed to travel by the patients to use the restroom.
