dba Eastern Idaho Regional Medical Center
ATTN: James Neeley, M.D.
Radiation Safety Officer
P.O. Box 2077
Idaho Falls, Idaho 83403-2077

SUBJECT: LICENSE AMENDMENT

Please find enclosed Amendment No. 28 to NRC License No. 11-27346-01 **naming Christopher O. Harker, M.D., as an authorized user for 10 CFR 35.100, 35.200, and oral administration of sodium iodide I-131, and removing authorization for Iodine-125 permitted by 10 CFR 35.1000 as Proxima Therapeutics, Inc. Iotrex™. Please note that Calvin McAllister, M.D. had his authorization for "35.1000 only Iodine-125 Gliasite RTS System" removed as well.** An environmental assessment for this licensing action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(iv). You should review the enclosed document carefully and be sure that you understand all conditions. You can call me at 817-276-6589 if you have any questions about this license.

In addition, please note that NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant. Since the NRC also accepts a letter requesting amendment of an NRC license, the signatory for such a request should also be the licensee or certifying official rather than a consultant.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address: http://www.nrc.gov/reading-rm/doc-collections/enforcement/.

An electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web site at: http://www.nrc.gov/materials/miau/med-use-toolkit.html. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html.

Thank you for your cooperation.

Sincerely,

//RA//
