EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 During normal operation while performing the weekly surveillance test on the Diesel

03 Fire Pump an item for corrective maintenance was identified. This item resulted in no

04 immediate effects on engine operation but maintenance action was implemented the fol-

05 lowing day. This necessitated removal of the pump from service for a three-hour period

06 This had no significant safety concerns since the alternate fire pump was available and

07 the item was readily rectified with the pump being promptly returned to service.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 This item involved a small oil weep at a coupling to tubing weld joint on the engine's

11 cylinder injection return line. This joint was removed, rebrazed and returned for

12 service. All other such couplings appeared in good condition.
