DOCKET NUMBER
PROD. & UTIL. FAC. P-547

April 4, 1976.

Nuclear Regulatory Agency,
Washington, D. C.

Gentlemen:-

We, the undersigned, residents of North Miami Beach forming part of Dade County Fla. are greatly alarmed over the highly radioactivem spent Nuclear Fuel which have been stored in liquid pits at the Turkey Point Nuclear Power Plant owned by the Fla. Power & Light Co., for the past two years.

As we learn from the Miami Herald of March 14th, 1976 some of this radioactivity has already escaped from the plant, the Fla. Power & Light claim that the releases have been small and pose no threat to the public, and although they have made attemps to close the leak inside the pits, they have so far been unsuccessful. On top of all these dangerous and life threatening elements F.P.L. have announced their intention of building another Nuclear Plant in the immediate vicinity.

Therefore, we the undersigned, believe it is up to your Regulatory Agency to keep the public duly informed as to the potential hazards resulting from such leaks and make sure that F.P.& L. repair these dangerous defects, before your distinguished agency will allow them to build another Nuclear Plant in this part of the State.

Looking forward to your early reply, we remain,

Very truly yours,
Bernard Rakov
