Subject: Docket No. 50-482: Completion of Corrective Actions Associated with NRC Generic Letter 2004-02, "Potential Impact of Debris Blockage on Emergency Recirculation During Design Basis Accidents at Pressurized-Water Reactors"

Gentlemen:

By letter dated June 20, 2008 (Reference 3), Wolf Creek Nuclear Operating Corporation (WCNOG) committed to completing those corrective actions associated with Generic Letter (GL) 2004-02 described in References 1 and 2 by September 30, 2008.

As requested by GL 2004-02, WCNOG has performed a mechanistic evaluation of the potential effects of post-accident debris on the recirculation functions of the emergency core cooling systems and the containment spray system following postulated design basis accidents. Those supporting calculations, evaluations, drawings, design changes and procedures required to support conformance with the regulatory requirements identified in GL 2004-02 have been issued and implemented.

Consistent with Reference 3, WCNOC will submit an update to information contained in WCNOC's response to Generic Letter 2004-02 Requested Information Item 2 (Reference 2) by December 24, 2008. If you have any questions concerning this matter, please contact me at (620) 364-4084, or Mr. Richard D. Flannigan at (620) 364-4117.

Sincerely,

A handwritten signature in black ink, appearing to read "TJG", with a stylized flourish at the end.

Terry J. Garrett
