Proprietary Notice
This letter transmits proprietary information in accordance with 10 CFR 2.390. Upon the removal of Enclosure 1, the balance of the letter may be considered non-proprietary.

April 14, 2015
GEH Letter No. 175528-011, Revision 1
Tennessee Valley Authority
Browns Ferry Nuclear Plant
PO Box 2000
Decatur, Alabama 35609-2000

To: Peter Donahue (TVA)
From: Scott Gowdy (GEH)

Subject: Revised GEH Slides for TVA Presentation to the NRC in Support of Steam Dryer Replacement

References:

1) GE Hitachi Nuclear Energy Contract Number 6871
2) GEH letter No. 175528-011, Scott Gowdy (GEH) to Peter Donahue (TVA) entitled "GEH Slides for TVA Presentation to the NRC in Support of Steam Dryer Replacement," dated April 8, 2015.

This letter transmits a revision to the GE Hitachi Nuclear Energy (GEH) slides to be incorporated into the TVA presentation for the NRC meeting to be held in support of the Browns Ferry Steam Dryer Replacement project.

Please note that Enclosure 1 contains information which is considered proprietary by GEH and should be protected in accordance with the provisions for such information pursuant to the TVA / GEH proprietary agreement. In support of TVA's use of the enclosed information with the NRC, the affidavit contained in Enclosure 3 identifies that the information contained in Enclosure 1 has been handled and classified as proprietary to GEH. GEH hereby requests that TVA request that the NRC withhold the information contained in Enclosure 1 from public disclosure in accordance with the provisions of 10 CFR 2.390 and 9.17. GEH requests that any transmittal of this proprietary information to the NRC be accompanied by the enclosed affidavit and proprietary notice. In order to maintain the applicability of the affidavit and to meet the requirements of 10 CFR 2.390, the transmittal to the NRC should:

1) Faithfully reproduce the proprietary information,
2) Preserve the proprietary annotations, and
3) Include the words similar to "GEH Proprietary Information" at the top of first page and each page containing the proprietary information.

Further, 10 CFR 2.390 requires that the proprietary information be incorporated, as far as possible, into a separate paper. Therefore, Enclosure 1 contains the proprietary information, and the non-proprietary information is provided in Enclosure 2.

Based on past discussions with the NRC, GEH has been encouraged to request its customers to provide a paragraph similar to the following paragraph in the customer letters transmitting proprietary information to the NRC in order to clearly indicate the proprietary nature of the information and to document the source of the proprietary information as indicated in the GEH affidavit.

> "The enclosed documents contain proprietary information as defined by 10 CFR 2.390. GEH, as the owner of the proprietary information, has executed the enclosed affidavit, which identifies that the enclosed proprietary information has been handled and classified as proprietary, is customarily held in confidence, and has been withheld from public disclosure. The proprietary information was provided to TVA in a GEH transmittal that is referenced by the affidavit. The proprietary information has been faithfully reproduced in the enclosed such that the affidavit remains applicable. GEH hereby requests that the enclosed proprietary information be withheld from public disclosure in accordance with the provisions of 10 CFR 2.390 and 9.17. Information that is not considered proprietary is provided in a separate enclosure."

If you have any questions, please do not hesitate to contact me.

Very truly yours,

Scott R. Gowdy
