Re: Florida Power & Light Company
Proposed Turkey Point Units 6 and 7
Project No. 763
Supplement 3 NRC RIS 2007-08 Response

The NRC issued Regulatory Issue Summary (RIS) 2007-08, *Updated Licensing Submittal Information to Support the Design-Centered Licensing Review Approach*, on April 16, 2007. The RIS was intended to promote standardization of combined operating license (COL) applications and to facilitate the establishment of a predictable and consistent method for reviewing applications. The initial Florida Power & Light Company (FPL) response to RIS 2007-08 was submitted on July 2, 2007 by FPL letter L-2007-111. The initial response was supplemented on October 26, 2007 and July 22, 2008 by FPL letters L-2007-174 and L-2008-157, respectively.

The FPL RIS 2007-08 response supplement 3 revises the planned submittal date of the Turkey Point Units 6 and 7 COL application from March 2009 to June 30, 2009.

If you have any questions regarding the updated schedule, please contact Martin Gettler, Vice President New Nuclear Projects, at (561) 691-7487.

Sincerely yours,
