Subject:	[External_Sender] Radiological Health Final Rules
Date:	Wednesday, February 08, 2017 7:16:57 PM
Attachments:	Washington Radiological Rules for NRC February 2017.pdf Completed Cross-Reference to Compatibility Comments on Washington Regula....docx

---

Attached to this e-mail is a PDF of Washington State's Final Radiological Health Rules for the following chapters:

- 246-231 WAC, Packaging and transportation of radioactive material
- 234-232 WAC, Radioactive materials – licensing applicability
- 246-233 WAC, Radioactive materials – general licenses
- 246-235 WAC, Radioactive materials – specific licenses
- 246-237 WAC, Radiation protection – physical protection of category 1 and category 2 quantities of radioactive material

These final rules adopted the following RATS:

RATS ID	Title
2012-4	Requirements for Distribution of Byproduct Material
2013-1	Physical Protection of Byproduct Material
2013-2	Distribution of Source Material to Exempt Persons and to Genera Licensees and Revision of General License and Exemptions
2015-4	Miscellaneous Corrections

We also attached a document titled 'Completed Cross-Reference to Compatibility Comments on Washington Regulations 2-2017' addressing NRC comments from prior submittals. We highlighted the rule text to show you where we made the changes, per NRC's request.

We believe that adoption of these revisions satisfies the compatibility and health and safety categories established in the Office of the Nuclear Material Safety and Safeguards (NMSS) Procedure SA-200.

If you have any questions, please contact Earl Fordham, Deputy Director, at (509) 946-0234.
