Gentlemen:

Thank you for your letter of December 17, 1979, informing us of steps you have taken to correct the item of noncompliance concerning activities under NRC License No. SNM-1097 brought to your attention in our letter of November 20, 1979.

With regard to the item of noncompliance concerning initial emergency plan training for the Emergency Directors and Survey, Re-Entry and Facilities Damage Control Teams, we have reviewed your response and find no new information which warrants changing the finding. As previously discussed, it is NRC's position that training in any revised emergency plan must be completed by the implementation date of that revision.

As a result of our phone conversations with your Licensing and Compliance Audits Manager on January 17, 1980, it is our understanding that you will provide a supplementary response, within 15 days. This response will more fully describe your corrective action regarding the initial training of Emergency Directors, and specify completion dates for the initial emergency plan training of the Emergency Directors and members of the emergency teams.

We appreciate your cooperation with us.

Sincerely,

J. Philip Stohr
