Reference: Docket No. 50-285

Dear Mr. Seyfrit:

In response to a request by Mr. R. Caldwell on October 23, 1981, made during an exit interview concerning a Fort Calhoun Station physical security inspection, the Omaha Public Power District attaches an address list of all contractors and vendors having access to the Fort Calhoun Station.

Pursuant to Mr. Caldwell's statements at the exit interview, it is the District's understanding that an IE Bulletin may be issued in the near future formally requesting the submittal of the attached contractor/vendor information from all commercial operating reactor facilities. However, it is the District's understanding that at this time this information has been requested only for contractors/vendors granted access to Region IV commercial nuclear power facilities, who will then receive letters from your office re-emphasizing contractor/vendor responsibilities regarding personnel security reviews. The District appreciates Region IV's assistance in informing contractors/vendors of their security responsibilities when performing work for nuclear power plant licensees. The District is interested in the results of this effort regionally and also nationally if the Commission decides to implement this program in all compliance regions.

Sincerely,

W. C. Jones
Division Manager
