Subject: Vermont Yankee and Yankee Atomic Electric Company Organizations

Dear Sir:

Pursuant to Section 50.59 of the Commissions Rules and Regulations, Vermont Yankee hereby proposes the following modification to Appendix A of the Operating License.

Proposed Change:

Replace existing pages 191, 192, 194 and 197 with the attached revised pages 191, 192, 194 and 197. The revised pages 191, 192, and 194 reflect the current organizational structure of the Vermont Yankee Nuclear Power Corporation and Yankee Atomic Electric Company. Page 197 has been revised to reflect a proposed administrative change to the responsibilities of the Vermont Yankee Nuclear Safety Audit and Review Committee.

Reason for Change:

The proposed changes to Figure 6.1.1 on page 191 reflect changes in the organizational structure of Vermont Yankee Nuclear Power Corporation and Yankee Atomic Electric Company. The proposed changes to Figure 6.1.2 on page 192 and section 6.2.A.1 on page 194 reflect organizational changes which delete the position of Technical Services Supervisor. In addition, minor changes to these pages are made to update position titles and membership responsibilities of several professional technical personnel. The proposed change to Section 6.2.B.5 on page 197 is administrative in nature and will clarify the responsibilities of the Vermont Yankee Nuclear Safety Audit and Review Committee.

Safety Consideration:

This proposed change is administrative in nature and does not diminish

the combined expertise of the respective staffs.

This proposed change has been reviewed by the Nuclear Safety Audit and Review Committee.

Fee Determination:

This change is pro forma, administrative in nature, and has no safety or environmental significance. For these reasons, Vermont Yankee Nuclear Power Corporation proposes this change as a Class II Amendment which requires a fee payment of $1,200.00. A payment of $1,200.00 was enclosed with Reference (b) which was subsequently withdrawn by Reference (c). Proposed Change No. 86 is similar in content to Reference (b), but the scope of the organizational change has been significantly reduced. For this reason, Vermont Yankee requests that the fee payment enclosed with Reference (b) be applied to the review of Proposed Change No. 86.

Schedule of Change:

The changes described above will be incorporated into the Vermont Yankee Technical Specifications upon receipt of your approval.

We trust you will find this information satisfactory, however, should you desire additional information, feel free to contact us.

Very truly yours,

VERMONT YANKEE NUCLEAR POWER CORPORATION

L H Heider

L. H. Heider
Vice President

RLS/smw

COMMONWEALTH OF MASSACHUSETTS)
)ss.
COUNTY OF WORCESTER)

Then personally appeared before me, L. H. Heider, who, being duly sworn did state that he is a Vice President of Vermont Yankee Nuclear Power Corporation, that he is duly authorized to execute and file the foregoing request in the name and on the behalf of Vermont Yankee Nuclear Power Corporation and that the statements therein are true to the best of his knowledge and belief.

6.2 REVIEW AND AUDIT

Organizational units for the review and audit of plant operations shall be constituted and have the responsibilities and authorities outlined below:

A. Plant Operations Review Committee

1. Membership

a. Chairman: Plant Superintendent

b. Vice-Chairman: Assistant Plant Superintendent

c. Engineering Support Supervisor

d. Operations Supervisor

e. Maintenance Supervisor

f. Reactor and Computer Supervisor

g. Chemistry and Health Physics Supervisor

h. Instrument and Control Supervisor

i. Health Physicist

2. Qualifications

The qualifications of the regular members of the Plant Safety Committee with regard to the combined experience and technical specialties of the individual member shall be maintained at a level at least equal to or higher than as described in Specification 6.1.

3. Meeting frequency: Monthly, and as required, on call of the Chairman.

4. Quorum: Chairman or Vice-Chairman plus four members or their designated alternates.

NOTE: For purposes of satisfying a quorum, the Vice-Chairman may be considered a member providing that the Vice-Chairman is not presiding over the meeting.

POOR ORIGINAL

d. Power Plant Design

e. Reactor Engineering

f. Radiation Safety

g. Safety Analysis

h. Instrumentation and Control

i. Metallurgy

3. Meeting Frequency: Semi-annually and as required on call of the Chairman.

4. Quorum: Chairman or Vice Chairman plus four members or designated alternatives.

5. Responsibilities

a. Review proposed changes to the operating license including Technical Specifications.

b. Review minutes of meetings of the Plant Operation Review Committee to determine if matters considered by that committee involve unreviewed or unresolved safety questions.

c. Review matters including proposed changes or modifications to plant systems or equipment having safety significance or referred to it by the Plant Operation Review Committee or by the Plant Superintendent.

d. Periodic audits of plant operations, and audits of the facility fire protection program and implementing procedures shall be performed under the cognizance of the Committee.

e. Investigate all reported instances of violations of Technical Specifications, reporting findings and recommendations to prevent recurrence to the Manager of Operations.

f. Perform special reviews and investigations and render reports thereon as requested by the Manager of Operations.

g. Review proposed tests and experiments and results thereof when applicable.

h. Review abnormal performance of plant equipment and anomalies.
