EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 The Action Statement of Technical Specification 3.7.9.2(e) was entered as a result
03 of smoke detectors associated with the Preaction Sprinkler System on Control
04 Building 400' elevation being removed so that welding could be performed in the
05 area without affecting the Sprinkler System. There were no adverse consequences
06 since the Tech. Spec. Action Statement was met with no redundant equipment in the
07 same area, and a one hour fire watch patrol implemented.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 Due to welding being performed in the area, the smoke detectors were removed to
11 avoid tripping the Sprinkler System deluge valve. Corrective action was to
12 comply with Tech. Spec. Action Statement by having a one hour fire watch patrol
13 implemented for areas which do not have redundant equipment. The detectors were
14 subsequently reinstalled and the Sprinkler System verified to be functional.
