APPENDIX A

NOTICE OF VIOLATION

Carolina Power & Light Company
H. B. Robinson 2

Docket No. 50-261
License No. DPR-23

As a result of the inspection conducted on November 11 - December 10, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violations were identified.

A. License Condition Paragraph 3.G requires that a secondary water chemistry monitoring program be established and implemented which includes procedures identifying corrective actions required to return secondary chemistry to its normal band following an out of control band condition.

Contrary to the above, as of December 2, 1982, procedures had not been established which define the corrective actions required for common potential out of control band secondary chemistry events.

This is a Severity Level V Violation (Supplement I).

B. 10 CFR 50, Appendix B Criterion 16 requires that measures shall be established to assure that significant conditions adverse to quality are promptly identified and corrected, including determination of the cause of the condition and action to prevent recurrence. This requirement is implemented by Corporate Quality Assurance Program Section 15 and plant Administrative Instructions 12 and 15 concerning licensee event reporting. Licensee Event Report 81-34 documented corrective action to prevent recurrence of inoperability of safety-related equipment due to inadequate freeze protection maintenance controls.

Contrary to the above, as of November 18, 1982, adequate corrective actions to prevent recurrence had not been implemented in that maintenance work on freeze protection circuitry was performed without using the required equipment controls of Administrative Instruction 11.6.

This is a Severity Level IV Violation (Supplement I).

Pursuant to the provisions of 10 CFR 2.201, you are hereby required to submit to this office within thirty days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will
