Center for Excellence in
Nuclear Technology, Engineering, and Research

March 29, 1996

U. S. Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Subject: Revision 3, Reactor Operation Requalification Plan and Audit and Review Plan for the protection of SNM of low strategic significance; Docket 50-407, License No. R-126, University of Utah Center for Excellence in Nuclear Technology, Engineering and Research.

Dear Sir or Madam:

Enclosed are updated copies of the CENTER's Reactor Operation Requalification Plan and Audit and Review Plan. The Code of Federal Regulations does not dictate that we send copies of these revisions, but we would like to provide you with these two documents for your records. Editorial changes made at this time have not reduced the effectiveness of either document.

Respectfully,

David M. Slaughter, Ph. D.
Reactor Administrator
