OCT 2 4 1985

Docket No.: 50-461

Mr. Frank A. Spangenberg
Director of Nuclear Licensing
Configuration Management
Clinton Power Station
P.O. Box 306
Mail Code V920
Clinton, Illinois 61727

Dear Mr. Spangenberg:

SUBJECT: DRAFT TERs FOR ITEM 1.2 "POST TRIP REVIEW: DATA AND INFORMATION CAPABILITIES" OF GENERIC LETTER 83-28 FOR CLINTON POWER STATION

By letter cated October 1, 1984 Illinois Power Company (IP) provided a response to Generic Letter 83-28 (Required Actions Based on Generic Implication of Salem ATWS Events). The staff's consultant Science Applications International Corporation (SAI) has reviewed IP's response to Item 1.2 "Post Trip Review: Data and Information Capabilities" of Generic Letter 83-28. The enclosed draft TER prepared by SAI identifies the areas where IP's response does not indicate that the post-trip review data and information capabilities are adequate to satisfy the requirements of Generic Letter 83-28.

After you have reviewed this TER you should contact the staff's project manager for your application to arrange a conference call between IP, the staff and SAI to resolve the discrepancies identified. It is recommended that these discrepancies be resolved prior to the issuance of a low-power license to avoid the necessity of any license conditions related to this item.
