6 Little Pine Lane
Exeter, New Hampshire 03833

Secretary of the Commission
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Docketing and Services Branch

Dear Sir:

I am writing in support of the NRC's proposed new rule that would clarify the requirements new power plants must meet before low-power testing is conducted.

Opponents and self-serving public officials are trying to exploit the ambiguity of the the current rule to stop the opening of Seabrook Station. This action is deplorable.

The NRC should not make their decision based on a bunch of misinformed individuals. They should base their decision on the facts and the facts are that Seabrook Station was well built, it is safe, it is a non-pollutant, is well staffed and is ready to operate. I encourage the Commission to rule in favor of the proposed rule and give Seabrook Station an operating license.

Sincerely,

Raymond E. Cyr
