Subject: Catawba Nuclear Station
Docket Nos. 50-413 and 50-414
NRC Inspection Report Nos 50-413, 414/88-22
Revised Reply to Notice of Violation

Gentlemen:

My September 30, 1988 submittal regarding the same subject indicated that an existing Catawba Nuclear Station Directive and Technical Specification interpretation would be revised to more clearly indicate the requirements for controlling overtime for those personnel performing safety related work. These revisions were to be completed by May 5, 1989 as indicated in my March 29, 1989 letter. Please note that after further review it has been determined that changes to the Technical Specification interpretation are not needed. The changes to Station Directive 3.0.8 approved April 7, 1989 will avoid further violations. Also, a policy statement has been issued for all three Duke nuclear stations regarding the control of overtime.

Very truly yours,

Hal B. Tucker
