5. IP 71004	08/11/09	IP 71004	04/30/10

TRAINING: None

REMARKS: IMC 0612 (Power Reactor Inspection Reports) has been revised to support changes to IMC 0612 Appendix B, "Issue Screening," reference the new IMC 0310, "Components Within The Cross-Cutting Areas " and relocate guidance. In addition, guidance has been revised to address Reactor Oversight Process (ROP) feedback forms. Hyperlinks have also been added to assist in assessing the content of referenced documents and sections within IMC 0612.

IMC 0612 Exhibit 3 (Sample Reactor Inspection Report) has been deleted. The IMC 0612 Working Group is currently developing a replacement document.

IMC 2517 (Watts Bar Unit 2 Construction Inspection Program) has been revised to reflect corrections and enhancements identified by the inspection staff and to incorporate recommendations made during the 2008 and 2009 self-assessments.

IP 62710 (Power-Operated Gate Valve Pressure Locking and Thermal Binding) has been revised to include a modification that can be used to address pressure-locking concerns.

IP 71004 (Power Uprate) has been revised to address internal stakeholder comments provided after implementing the changes to the procedure that

were made as a result of the 2007 Office of the Inspector General audit (July 2008 revision). The revision also responds to a feedback form related to sample size clarification.

DISTRIBUTION: Standard
