**BELL BEND NUCLEAR POWER PLANT
JULY 2010 BBNPP SCHEDULE UPDATE
BNP-2010-175 Docket No. 52-039**

- References:
- 1) BNP-2009-117, T. L. Harpster (PPL) to U.S. NRC, "May 2010 BBNPP Schedule Update", dated May 7, 2010.
 - 2) BNP-2010-070, T. L. Harpster (PPL) to U.S. NRC, "Response to RIS 2010-01: Reactor Licensing Applications and Process for Determining Budget Needs for Fiscal Year 2012."

As the NRC staff is aware, PPL is actively preparing revisions to the Bell Bend Nuclear Power Plant (BBNPP) COLA to reflect changes to the site footprint. Our most recent schedule for submitting these revisions to the NRC was provided in Reference 1. The purpose of this letter is to provide a near-term update to that schedule.

The attached schedule provides an update for the period through October 2010. As acknowledged in the referenced letter, PPL is continuing to develop information that will provide a clearer understanding of our longer term critical path activities. Onsite geotechnical and well drilling physical work associated with the revised footprint has been completed, and associated laboratory analyses are scheduled to begin this month.

Also, please note that the new schedule provided for the Physical Security Plan & Assessment also supersedes the information provided in Reference 2.

PPL will continue to keep the NRC staff apprised of changes to this schedule in a timely manner.

If you have any questions regarding the information in this letter, please contact Rocco R. Sgarro, Manager – Nuclear Regulatory Affairs, at 570.802.8102.

Respectfully,

Terry L. Harpster

TLH/kw
