Subject: Notification of Cameron's Shipment of Barton Nuclear Safety Related DP Devices

Dear Mr. Peralta,

I am sending you this as an update to the email I sent you on December 17th 2009 indicating that we successfully underwent another NUPIC audit (#20319) in November.

In review, the August 2007 NUPIC Joint Utilities Audit of Cameron Measurements Systems and associated Requests for Corrective Action (RCA's) have been closed. In November of 2009, Cameron underwent another NUPIC Joint Utilities audit (NUPIC Audit # 20319) that was headed by Mr. Dave Glockner at PPL Susquehanna, LLC

After the completion of the audit we began the process of manufacturing the 763a and 764 transmitters. To date we have successfully manufactured and shipped 3 instruments under our 10 CFR 50 Appendix B Quality Assurance Program and are in process of filling current orders.

We feel that it is important that we updated you on this important milestone. Please feel free to contact Chuck Rogers or myself if the USNRC requires additional information. I appreciate your support throughout this endeavor.

Sincerely,

Matt DeWitt
Director of Business Development
