OIG-12-A-02

Status of Recommendations

Recommendation 4: Clearly delineate the roles, responsibilities, and expectations associated with each stakeholder involved in SEP report creation. As part of this, NRC should evaluate whether:

- OGC and/or Division of Contracts personnel should play a greater role in the review of the SEP documentation for sufficiency, particularly as it pertains to documenting SEP conclusions in a manner that fully complies with FAR.
- Templates or other tools should be developed that would facilitate better compliance on the part of SEP personnel, particularly as it pertains to fully documenting the logic behind the SEP's decisions and conclusions.

Agency Response
Dated May 14, 2012:

ADM has clearly delineated the roles, responsibilities, and expectations associated with each stakeholder involved in SEP report creation and has included them in the following: Instructions for Award Decision Memorandum (ADAMS ML12122A059), SEP Chairperson Appointment Memorandum (ML12122A115), Instructions for Preparing a Competitive Range Report (ADAMS ML12122A061), and Instructions for Technical Evaluation (ADAMS ML12122A136).

ADM evaluated whether OGC and/or Division of Contracts personnel should play a greater role in the review of the SEP documentation for sufficiency. ADM does not recommend any changes to the SEP process, nor to the roles played by the participants. The SEP members are technical evaluators and their independent technical judgment cannot be interfered with by non-SEP agency staff members.

Currently, the assigned Contracting Officer or Contract Specialist and an OGC attorney are required to review an
