The Commission has approved the revised Steering Committee Charter, including the provision that the Steering Committee Chair may modify the composition of the committee and disband the committee under the conditions outlined in the charter. However, the third triggering condition (i.e., "routine executive-level meetings with industry are no longer needed") for closing the charter and disbanding the Steering Committee should be struck from the revised charter.

The Commission has approved the staff's proposal to consolidate the Station Blackout Mitigation Strategies rulemaking with the Onsite Emergency Response Capabilities rulemaking and rulemaking for numerous Emergency Preparedness actions, as described in Enclosure 6 of this paper.
