Consistent with NRC's regulations, which require the staff to approve or deny a license renewal application once the staff's safety and environmental reviews are complete, I approve authorizing the Director of the Office of Nuclear Reactor Regulation to issue the renewed operating license for Fermi 2. This approval does not reflect a judgement on the pending Motion to Reopen the Record and the proposed new contention. In the event the Board or Commission were to set aside the renewed license, NRC's regulations provide that the current license, which is effective until March 20, 2025, would be reinstated.
